

OUR 90,000-FT² EXPANSION IS COMPLETE!

Look inside to learn how this will reshape our community.

EXPANSION PROJECT COMPLETE!

2025 may go down as the most transformative year in our 52-year history. Phase one of our 90,000-square-foot recycling expansion is officially complete – and it's already reshaping what's possible for EGA Spectro Alloys.

While we're still ramping up to full capacity, this innovative facility will soon enable us to produce up to 120 million pounds of high-quality recycled aluminum billets annually – all from scrap aluminum. Even more exciting, this milestone has created 50 new full-time jobs right here in our local community.

To mark the occasion, we hosted an unforgettable grand opening in early October. Hundreds of people – customers, vendors, elected officials, regulators and team members – gathered to celebrate our bold new chapter. The energy was electric, and the sense of shared excitement was palpable.

In this issue of The Cast, you'll get an inside look at how EGA Spectro Alloys is growing – not just in size, but in impact. This expansion is about more than capacity. It's about raising the bar for quality, sustainability and operational excellence at every level.

Thank you for being part of our journey.

EXPANSION AT A GLANCE

90,000 SQUARE FEET

50 NEW JOBS

95% CARBON REDUCTION
COMPARED TO NEW ALUMINUM

120 MILLION POUNDS OF
ADDITIONAL RECYCLING CAPACITY PER YEAR

WORLD-CLASS LABORATORY

The facility includes a new, world-class quality laboratory equipped with cutting-edge technology – all designed to ensure customers receive the highest quality recycled aluminum.

BILLET CASTING PLANT

WE AREN'T DONE GROWING!

We are proud to announce phase two of the billet project which will add about 100 million pounds of annual recycling capacity when it is completed in 2027. Phase two isn't just about growth; it's about technological advancement. It includes a batch homogenizer and an additional scrap melting furnace with automated charging, stirring and skimming.

INTRODUCING... THE EGA SPECTRO ALLOYS SCHOLARSHIP!

EGA Spectro Alloys recently established an annual scholarship at Dakota County Technical College. The EGA Spectro Alloys scholarship will be awarded annually to two local students enrolled in the school's Construction & Manufacturing program. We are thrilled to support our local trade school in this meaningful way!

Spectro has also made contributions to Rosemount Fire Department, Hope Fieldhouse, Hastings Middle School, Leprechaun Days, and Hastings Area Rotary Festival on the River.

QUADRUPLING OUR SOLAR ENERGY PRODUCTION

We will soon have a total of 1.2 megawatts of solar capacity – enough to power more than 200 homes! Headlining our solar expansion is a solar canopy which vehicles travel under as they enter our property.

SPECTRO IN YOUR LIFE

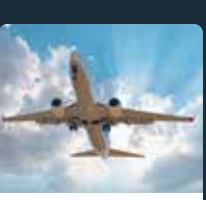

Aluminum recycled in our new billet facility is found in products we use every day, such as:

Cars

Boats

Airplanes

Trailers

Docks

Railings
